Git,
Testing,
Architecture

RELEVANT QUALIFICATIONS

Nov 2013: Bachelor of Information and Communications Technology (Universal College of Learning)

PASSION PROJECTS

- 'Let's Make Music' online and collaborative web-based digital audio workstation (DAW) creator
- Committee member and "IT Manager" for Waitare Rise Residents Society (WRRSI).
- Following the July 2022 flooding in Waitare Rise and limited local government support, I initiated and launched a custom community web platform on behalf of the WRRSI. The solution provides residents with secure communication and collaboration tools, including transparent polling with AGM proxy voting, surveys, community events, news articles, member management, and a "Lend-a-Hand" system for emergencies and hardship.
- Built with end-to-end encryption, MFA, and RBAC policies to ensure privacy and transparency while avoiding third-party data sharing.
- Successfully adopted across the Waitare Rise community, strengthening resident engagement and giving members a unified voice.
- Now developed as a multi-tenant platform, with growing interest from other communities seeking similar capabilities. (More info: <https://waitarererise.org.nz/> and <https://rnz.co.nz/news/national/471867/1>)
